Fibonacci Trader is introducing Cycle Trading to the Fibonacci Trader software!  Trace Burton will demonstrate how to use these fundamental tools during a special guest presentation at our upcoming workshop in Las Vegas.  Trace researched and developed this Cycle Trading Geometry during his 10+ years trading Index futures.  His Cycle work embodies PRICE direction, PRICE targets, and TIME [Pulse Points and Support Levels] in route to target.  Join us for a unique presentation on this remarkable new addition to the Fibonacci Trader software.

Trace asks: "What color is your time . . . NOW!"

Above is ES Futures covering 4/24/07 and 4/25/07 with smallest 'Trading Wheel' unfolding.

Next page is same days with larger 'Wheels' showing there was resistance and support levels on 4/24 and there was nothing but support on 4/25.

Pick your 'Wheel' . . .
